Portfolio: abdulganiy-ibrahim-dev.vercel.app

PROFESSIONAL SUMMARY

Frontend Developer proficient in React, Next.js, TypeScript, JavaScript, and Tailwind CSS, with hands-on experience building responsive and user-centric web applications. Experienced in developing and deploying a SaaS platform, including authentication, state management, API integration, and component-based architecture. Strong understanding of modern frontend development practices, performance optimization, and accessibility principles. Seeking an opportunity to contribute to a collaborative engineering team while growing as a frontend developer.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React, Next.js, Tailwind CSS

Backend & Services: Supabase, REST APIs, Authentication

Tools: Git, GitHub, VS Code, Vercel

Concepts: Responsive Design, Component-Based Architecture, API Integration, State Management, Performance Optimization, Authentication, UI Development

PROJECTS

Sellora — Multi-Tenant Business Storefront SaaS

Built and deployed a full-stack SaaS platform enabling businesses to create online storefronts, manage products, track sales, and streamline daily operations.

Key Contributions

- Designed scalable frontend architecture and reusable components to ensure consistency and faster development.
- Implemented authentication, protected routes, and role-based access using Supabase.
- Developed core business features including product management, inventory tracking, customer records, and sales monitoring.
- Optimized performance and responsiveness across devices through efficient data handling and clean component structure.
- Built dynamic dashboards and management interfaces to help business owners monitor operations and key business data.
- Integrated REST APIs and backend services to enable seamless data synchronization across the platform.
- Developed responsive user interfaces with React, Next.js, and Tailwind CSS, ensuring a consistent experience across desktop and mobile devices.
- Implemented form validation and error handling to improve data accuracy and overall user experience.
- Structured application state and data flows to support maintainable and scalable feature development.

- Collaborated on UI/UX decisions, translating business requirements into intuitive and user-friendly interfaces.
- Leveraged Next.js features such as server-side rendering and optimized routing to improve performance and user experience.
- Established reusable design patterns and component standards that simplified future feature development and maintenance.

Technologies: React, Next.js, TypeScript, Tailwind CSS, Supabase, and JavaScript

EDUCATION

Federal University of Technology, Minna (FUTMINNA)

B.Tech. *Information Technology* | **Expected Graduation:** 2028

CORE COMPETENCIES

- React.js & Next.js Development
- TypeScript & JavaScript
- Responsive Web Design
- Component-Based Architecture
- State Management
- REST API Integration
- Authentication & Authorization
- Supabase Integration
- Database Design & Management
- Frontend Performance Optimization
- UI/UX Implementation
- Form Validation & Error Handling
- Git Version Control
- Problem Solving & Debugging

ADDITIONAL INFORMATION

- Built and launched a production-ready SaaS platform using React, Next.js, TypeScript, and Supabase.
- Passionate about creating intuitive user experiences and high-performance web applications.
- Skilled in translating business requirements into scalable frontend solutions.
- Experienced in optimizing application performance, accessibility, and responsiveness across devices.
- Strong advocate for clean code, reusable components, and maintainable software architecture.
- Continuously expanding expertise in modern JavaScript ecosystems and frontend engineering practices.
